

Schedule A

Approach - Design / Construct Standards

Typical Plan View

Typical Cross Section

Required Culvert Length	
length (m)	cover (mm)
13 (min.)	400 (min.)
14	600
16	800

note:

1. the length of culvert required will vary with the depth of cover (see table)
2. if there is an option to select the location of the approach, the requirement for a culvert may be avoided if a high point in the ditch grade is chosen
3. the minimum width of the approach is intended for typical machinery access, the width equipment may have to be increased to suit larger industrial equipment (ie: service rig)
